Dr Priya Raman

Marlow Fields Medical Centre
3 Pinner Row
Ashcombe Vale
ZZ99 3DF

Re: Mr Samuel Adeyemi

Date of birth: 14 March 1952 NHS number: 999 471 3382
12 Wreneley Gardens, Ashcombe Vale, ZZ99 3CZ

Pathology Report

Specimen type Serum and whole blood (EDTA)
Date collected 16 March 2026
Date received 16 March 2026
Date reported 18 March 2026
Laboratory number ASH/26/041882
Requested by Dr P Raman, Marlow Fields Medical Centre
Clinical details supplied Post-discharge monitoring. Repeat U&E and HbA1c requested.

Results

Test	Result	Units	Reference range
Sodium	139	mmol/L	133 - 146
Potassium	4.6	mmol/L	3.5 - 5.3
Creatinine	118 H	umol/L	59 - 104
eGFR (CKD-EPI)	52 L	mL/min/1.73m2	> 90
HbA1c (IFCC)	58 H	mmol/mol	20 - 41
Haemoglobin	129 L	g/L	130 - 170

Specimen ASH/26/041882, collected 16 March 2026.

Key: L = result below the quoted reference range. H = result above the quoted reference range. Reference ranges are those in routine use by this laboratory and may differ from those quoted by other providers. Results should not be compared directly with assays performed elsewhere.

Comments

Renal function: the estimated glomerular filtration rate is reduced at 52 mL/min/1.73m2, with a correspondingly raised serum creatinine of 118 umol/L. Sodium and potassium are both within the reference range on this specimen. A single reduced eGFR does not by itself establish chronicity, and the estimate is less reliable at extremes of muscle mass. Please interpret alongside earlier results and repeat renal profile as clinically appropriate.

Glycaemic control: HbA1c is raised at 58 mmol/mol against a laboratory reference range of 20 to 41

mmol/mol. This result reflects average glycaemia over the preceding two to three months and should be read in the context of any recent acute illness, transfusion or change in therapy.

Haematology: haemoglobin is marginally below the quoted reference range at 129 g/L. No further comment is offered on a single measurement. Please correlate all of the above with your clinical findings; this report is issued for the information of the requesting clinician and is not a clinical opinion.

Report authorised electronically by the duty clinical biochemist. Analyses performed at St Saviour's Hospital laboratory. Telephoned results are available on request; laboratory enquiries 01632 960118, quoting the laboratory number above.
